

COMPRESSED AIR COOLING | Air AHP Series

BRAZED ALUMINUM CONSTRUCTION

Features

- Full Line of Sizes and Features
- Brazed Bar and Plate Aluminum Core
- Energy Efficient
- High Performance
- High Flows 400-3500 CFM
- Vertical Air Flow
- High Technology Compact Design
- Optional Air Motor
- Rugged Heavy Duty Construction
- Excellent for Heat Recovery

Ratings

- Maximum Operating Pressure** 250 psi
- Maximum Operating Temperature** 350° F

Materials

- Cabinet** Steel with Baked Enamel Finish
- Core** Brazed Aluminum Bar and Plate
- Fan** Aluminum Hub, Polypropylene Blades
- Shroud** Painted Steel
- Motor** TEFC
- Fan Guard** Steel with Baked Enamel Finish

How to Order

AHP	-	<input type="text"/>	-	<input type="text"/>
Model Series AHP		Model Size Selected		Specify Motor Required 0 - No Motor 2 - Single Phase 60 Hz TEFC 115/208-230 Volt 3 - Three Phase 60 Hz TEFC 230/460 Volt 5 - Air Motor 6 - 575 Volt

Above specifications are based on 80 to 125 PSIG operating pressures. Maximum pressure drop, less than 3 psi. A flexible metal hose must be properly installed between the compressor and aftercooler to validate warranty. In addition, for mobile and other applications where there may be additional stresses to the connections, our 4-bolt SAE Flange should be used. Consult factory for pricing and availability.

All motors shown are TEFC. Other motor options available upon request. Published electrical ratings are approximate, and may vary because of motor brand. Actual ratings are on motor nameplate.

Fan motors **must not** be cycled. Outdoor applications must be protected from direct weather. If ductwork or additional static resistance is added to the cooler airstream, an auxiliary air mover may be required.

*3 phase motors available in 50Hz. Reduce performance by 10%.

Recommended Typical Installation

- Support piping as needed. Flexible connectors must be properly installed to validate warranty.
- Coolers should not operate in ambient temperatures below 35°F (1°C). Consult factory for recommendations.
- The fan cannot be cycled.
- AHP coolers operated outdoors must be protected from weather. Consult factory for recommendations.
- If ductwork or additional static resistance is added to the cooler airstream, an auxiliary air mover may be required.

⁽¹⁾ Air inlet to the air motor must be regulated to this pressure.

⁽²⁾ CFM (Free Air) consumption of the air motor. Lubrication = One drop of oil for every 50-75 CFM of air going through the motor. Use detergent SAE #10 oil. Filter, regulator and lubricators for the air motors are required, but not included.
